

Host  Plus

Hosting Your Success

Managed Services

Let us handle the management and day-to-day operations of your enterprise IT stack, while you can focus on your core business.

Product Overview

Moving from traditional IT infrastructure solution to managed environment means you do not lose focus on your business. Leveraging the latest technological advancements and combining it with expert team and years of experience Host1Plus can guarantee maximum value and the highest performance of your business.

Benefit from significant savings through higher utilization, improved provisioning, standardized processes, error and troubleshooting time reduction as well as hardware investments and support costs with our Managed Services.

Managed Services

Managed Infrastructure

Set your sight on offering your customers exactly what they need without worrying about installation, configuration and management of your infrastructure. Our trained industry professionals will take care of your IT infrastructure.

Migration

Migration is a complex process - that's where our experts are ready to help you. We have a deep practical knowledge in planning and executing large-scale infrastructure and service migrations. Let us handle that.
