

Hosting Your Success

Premium Dedicated Servers

Providing ultimate level of customizability and control, Host1Plus Premium Dedicated Servers are suitable for a large private cloud, full-stack application cluster or disaster recovery site deployments.

Product Overview

Three words: peace of mind. Host1Plus has been a well-established hardware distributor partner for years. We are taking this further by taking care of hardware customization, ordering, logistics and maintenance, so that you can concentrate on your business growth.

Bare metal does not mean "bare control" - powered by Host1Plus public API you can take control of all server actions and get insights into usage statistics much in the same way as with a Host1Plus Cloud solution.

As with Host1Plus Instant Dedicated Servers, with Host1Plus Premium Dedicated Servers everything is dedicated, nothing is shared - so you know the resources you are paying for will be there when you (or your application) expect them to be.

Key Features and Benefits

Platforms

- › Current gen x86 Intel or AMD, ARM
- › Multi-GPU enabled servers

Web interface

- › Feature rich and intuitive single pane of glass

Locations

- › Chicago, US
- › Los Angeles, US
- › São Paulo, BR
- › Frankfurt, DE
- › Johannesburg, ZA

Use Cases

Enterprises

When you are in need of a disaster recovery site, building a private cloud solution or require your data to be well connected and secure close to a specific market, running on a custom specified hardware, this solution definitely meets your enterprise needs.

With full virtualization and Trusted Compute support, Host1Plus Dedicated Servers are opening the doors to global markets which otherwise would be too cost prohibitive to get into.

Hosting Companies

Open up new locations for your clients without worrying about total cost of ownership or maintenance costs. Take control of your stack while having an ultimate control programmatically via API.

Data Intelligence and Security

Driven by data protection regulations or internal corporate security policies? – no problem. Host1Plus Premium Dedicated servers is the shared-nothing solution, where you have full control of data processing and storage stacks.
