

## Partner Review

Host1Plus and ServerCentral have been business partners since 2015. When we look for a partner we seek for organizations that share our core values – organizations that are focused on the customer, enjoy the challenge of doing things with quality and integrity, care about the people they work with and for, exhibit trust throughout all interactions and competently execute each and every aspect of their business.

The quality, consistency of work and communications with Host1Plus has remained high throughout our partnership.

The core values that most directly overlap between ServerCentral and Host1Plus - our attention on the customer as well as focus on competently executing each and every aspect of our businesses. Throughout our time working together, we have seen Host1Plus consistently operate in-line with these values.

After working with Host1Plus, we would recommend them as a reliable service provider. The consistency of Host1Plus operation delivers the confidence to know that customer's objectives and expectations will be met.

“

*After working with Host1Plus, we would recommend them as a reliable service provider. The consistency of Host1Plus operation delivers the confidence to know that customer's objectives and expectations will be met.*
